

Select each of Mr. Body's parts to get a close-up view of each vital organ and its function like the heart, brain, lungs, and more. Did you know that the liver is the largest single organ in your body, or that your lungs are full of 600 million tiny sacs called alveoli? Mr. Body makes learning about the human body fun!

#### **HOW TO PLAY IN PHONE MODE (Without VR/AR Goggles)**

- Launch the app on the iPad
- Be sure to allow camera and photo access
- Select Phone Mode
- Make sure you can see the cube through your phone
- Hold your device with one hand and hold the cube with your other hand, or use the optional stand in the package
- Select the body part you'd like to learn more about to discover interesting facts about the human body!
