Change Navigation source from "Auto" to the Garmin chartplotter.

Garmin Autopilot Setup Reference Sheet

Enabling Autopilot function on Chartplotter

If a Garmin autopilot is connected to a Garmin chartplotter the autopilot function must be enabled to be able to engage the autopilot from the chartplotter. To enable the autopilot on the chartplotter: *Home> Settings> System> Station Information> Autopilot Enable.*

*If the Autopilot Enable feature is not present check connections to the autopilot to make sure it is communicating on the NMEA 2000 network.

Enabling Dealer Autopilot Setup

On the GHC 20 helm display, from the heading screen, select ***Menu > Setup > System> System Information.***

Hold the center key for 5 seconds. Dealer Mode appears. Select Back > Back

If the option for Dealer Autopilot Setup is available on the Setup screen, the procedure was successful.

*If there is not a GHC 20 present. On the Garmin Chartplotter. *Settings> My Vessel> Autopilot Installation Setup.*
