ProfitNFT Review – My experience in using it

I was a beta tester for this product, and now I'm going to show you exactly how to use ProfitNFT.

You can rely on my opinion. Every word in this article is based on my personal experience, and I will try to make it as authentic as possible.

First to create your own NFT, go to the NFT creator. YOU can use all the doodles and images to create your own collection. You can start with a base template and modify into a thousand designs.

Once you've done, just click save and download the NFT to your computer. Then head to minting to get the URL for your NFT.

Next, you will have to connect your wallet, fill in all the information and click minting.

Finally, you'll do all the price settings. You can edit the estimated gas fee and once you're done just click confirm.

You'll be able to check all the information about your NFT transaction. A contract has also been automatically made so that you can start earning etherium from the NFT.
