Dec. 4	Jack	May 6	make-up
Dec. 11	Elle	May 13	make-up
Jan 8	Kelley	May 20	no all-star
Jan. 16*	Addy		
Jan. 22	Sarada		

\* = short week. Students may do two activities on one day or skip one activity.

Each student will have the opportunity to be the “All-Star of the Week.” An email will be sent to parents in advance so you can help your child prepare for their special week. The all-star activity schedule is as follows:

**Monday:** share All About Me poster

**Tuesday:** read a favorite picture book to the class

**Wednesday:** bring an estimation jar

**Thursday:** Show and Tell

**Friday:** Super Scientist! Our All-Star of the Week will have the opportunity to teach a 15-minute science experiment/lesson to the class! In order for this to be most effective, students should prepare carefully and rehearse their presentation at home. Parents may assist in the preparation, but students must teach the class on their own. Students may borrow 2-3 science experiment books from our classroom to help in their selection, and I will email several helpful websites to parents. (In a short week where Friday is a non-attendance day, the super scientist will demonstrate their experiment on Thursday.)
