To have your **iOS 15+ Device** read text out loud from your camera:

1. Tap the **Settings** icon and tap **Accessibility.**

2. **Tap Spoken Content**

3. Tap the toggle switch for either **Speak Screen or Speak Selection**, or both, to turn it on.

4. **Open the Camera app** 📷. **choose Photo from the available camera options and point the camera at some text.**

5. When the Camera detects text, the **Live Text button** ⬚ appears in the bottom left of the viewfinder. The detected text is highlighted with yellow corners. **Tap the Live Text button to select it.** The "live" text will appear on top of the viewfinder.

6. If you are using **Speak Screen**, swipe down from the top of the screen with two fingers. Your device will begin reading out the contents. If you are using **Speak Selection**, swipe or tap to select the text. On the options ribbon, select Speak.
