

Community-Based Counseling Providers

This is a partial listing of counselors and therapists in, and around, our community who work with children and families. This list is not exhaustive, and parents/guardians are encouraged to work with their insurance providers to find an in-network counselor or therapist. **We do not specifically endorse or recommend any of the providers on this list. However, we are providing this list as a courtesy to our school community as a resource.** We strongly encourage parents/guardians to confirm credentials and to ask questions of a potential provider to determine a good fit experience
