

Privacy Policy for Safra

Last Updated: August 2026

Safra ("the Extension") is designed with a strict privacy-first, on-device architecture.

1. Zero Data Collection

Safra does not collect, record, transmit, or store any personal information, browsing history, payment details, or website content on external servers.

2. On-Device Processing

All DOM analysis, dark pattern detection, fine-print summarization, and price tracking occur 100% locally on your machine using built-in browser APIs and local browser storage (IndexedDB).

3. No Third-Party Analytics or Remote Code

The Extension operates completely offline from third-party tracking services. We do not use remote scripts, telemetry, or external tracking APIs.

4. Contact & Support

For support or inquiries regarding this privacy policy, please contact the developer through the Chrome Web Store item listing page.
