

# Facebook Update

We love celebrating the great things happening in our schools on social media. We are writing to you to let you know that some recent changes on Facebook are making it a little tougher for our posts, videos, announcements and more to show up in your news feed.

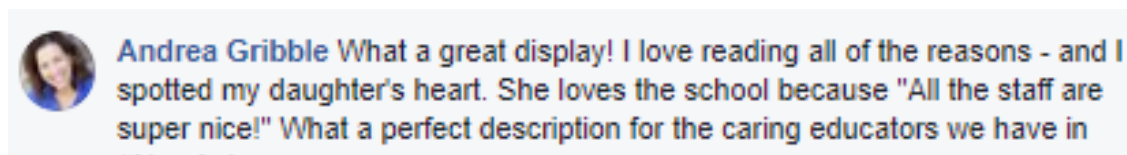

You can help ensure you don't miss a post by following a few basic steps:

1. Visit our Facebook page on either your computer or mobile device. (You can include the **official name of your Facebook page here**)
2. Click on the "Following" tab under the cover image.
3. Under the "IN YOUR NEWS FEED" section, select "See First."

Now the new posts from our Facebook page will show up in your news feed. Here is a video that will help walk you through the process if you need more help - [See First Video](#).

Another thing you can do to help get our posts out to more people is by commenting on our posts. The length of your comment actually matters too. So if you can share a comment like this it will help:

Sharing our posts on Facebook will also help more people see the awesome things going on in our district.

Thanks for your continued support of our schools!
