

How to Update Chromebooks

Try this first -  **How to Update Chromebooks.pdf**

If the previous directions do not work, try the directions below:

1. Log in to the chromebook	
2. Go to the bottom left circle icon to bring up the apps	
3. Click the "CK-E-TP 2.0.0" tile (if it does not show up, wait for a bit)	

After you click it, it will remove the initializing message in the browser and let you go to websites as normal.
