

William - LSST Stack tutorial
Hogg – element abundances, dimen reduction -> 3D visualization
Peter – software publishing checklist/whitepaper for papers w/ code
Andre – trading card game, game rules
Tom – python, archives, VO protocols/registry, -> astroquery module!
Kelle – astrobetter wiki maintenance (also profit)
Kelle – arceli project: web/blog content, get DOI -> ADS magic -> glory! Metadata!
Rudy – data science curriculum, data carpentry workshop for Astro! Survey for topics
Curtis – job/grant publication lists via ADS API. Need: bib/tex/py experience!
Megan – interactive dataviz w/ open exoplanet catalog & bokeh (python). Need: Travis
Alex – Kevin Bacon #... who is the Astro Bacon? Need: ADS/API, network graphs
Jason & Sarah – OS Exoplanet imaging package. Need: orbits, software design, python
Jeremey – astroquery + SNe catalog = BFF. Need: astroquery
Phil – AAS/WorldWideTelescope. Make WWT moar better, learn it!
David N – NOAO source cat (3B obj's!) look for new dwarf Galaxies!
David W – WWT, fix the reference frames, export videos of exoplanets, blow everyone's mind
Lia – astropy tutorials. Need: NBconvert & Sphinx (also profit!)
Wes – hyperlink/sourcecode avail in ASCL, link analysis
Erik – Hacks-Collector metahack (add yours today!)
Erik – giving all the software/python knowledge
Meg – Zooniverse, setup new citizen sci projects!
Alice – ASCL, looking for preferred citation info, be a detective, good remote hack!
Jonathan – WWT dataviz/3D/VR/hololens/FITS/VO/data help for your projects/data
Kelle – astropy workshop debrief. Need: thoughts!
Dan – NeuralNetworks w/ (kepler?) timeseries – tensorflow?
Jane – Pandas (python), Need: generalization. Has: sewing machine!
Zé – astroJulia package. Needs: Julia
Jim – gender in astro Q/A
Jim – vlog/youtube
