

Click Here, Write the Title of the Article, Use Capitalization at the Beginning of the Word (Maximum 20 Words)

ANONYMIZED MAIN MANUSCRIPT. Do not include author names, affiliations, email addresses, ORCID iDs, acknowledgments that identify the authors or institutions, or other identifying information in this file

Abstract

Maximum 250 words. Use a structured abstract: Background, Objective, Methods, Results, and Conclusion. Do not cite references in the abstract unless essential

Background: [Insert text]

Objective: [Insert text]

Methods: [Insert text]

Results: [Insert text]

Conclusion: [Insert text].

Keywords: Insert 3-5 keywords in English, preferably MeSH terms, arranged alphabetically and separated by semicolons.

INTRODUCTION

Provide the study background, summarize relevant current evidence, identify the research gap, explain the significance of the study, and state the objective, research question, or hypothesis clearly. Keep the section focused and avoid an extensive literature review.

[Insert Introduction here.]

METHODS

Describe the study with sufficient detail for readers to understand and evaluate the work. Include the components below as applicable to the study design. Use the relevant reporting guideline (e.g., CONSORT, STROBE, PRISMA, PRISMA-ScR, COREQ/SRQR, CARE).

Study Design

[Specify the research design and, where applicable, the reporting guideline used.]

Setting and Study Period

[Describe the study setting/location and period of data collection]

Population and Participants

[Describe the target population, eligibility criteria, recruitment, and participant characteristics relevant to the methods.]

Sample and Sampling

[Describe the sampling method and sample-size determination, where applicable.]

Instruments and Measures

[Describe instruments, scales, questionnaires, interview guides, validity/reliability, and adaptation/translation where relevant.]

Data Collection

[Describe data-collection procedures in sufficient detail.]

Data Analysis

[Describe statistical, qualitative, mixed-methods, or other analytic procedures and software used, where applicable.]

Ethical Considerations

[State the ethics committee/IRB, approval number where applicable, informed-consent procedures, and measures to protect privacy and confidentiality.]

RESULTS

Present findings clearly and logically according to the study objectives or research questions. Avoid unnecessary duplication of the same information in text, tables, and figures. Interpretation should be limited in this section unless the article type combines Results and Discussion.

[Insert Results here.]

Tables and Figures

Tables and figures must be numbered consecutively, cited in the text, and accompanied by clear titles/captions. Table titles appear above tables; figure captions appear below figures. Define abbreviations in notes and acknowledge secondary sources or permissions where applicable.

Table 1. First Table Title			
	Variable	f	%
Sex			
	Female	xx	xx,x
	Male	xx	xx,x
Ethnic			
	Sunda	xx	xx,x
	Jawa	xx	xx,x
	Other	xx	xx,x
Economic statis			
	Baik	xx	xx,x
	Rendah	xx	xx,x
Multitransfusion			
	1-5 years	xx	xx,x
	> 5 years	xx	xx,x
Mother's Education			
	Higher (University)	xx	xx,x
	Middle (Senior High School)	xx	xx,x
	Basic (Elementary, Yuniior High School)	xx	xx,x
Family Involvement			
	High	xx	xx,x
	Low	xx	xx,x

Anxiety		
No	xx	xx,x
Yes	xx	xx,x

If the image is a secondary source, it is necessary to mention the source. The image description is placed at the bottom of the image. The picture does not need to be framed.

Figure 1. Example of Writing Caption on Picture

DISCUSSION

Interpret the principal findings in relation to the study objectives; compare them with relevant previous research; explain similarities, differences, and possible reasons; describe the contribution to nursing knowledge and practice; discuss implications; and present relevant strengths and limitations.

[Insert Discussion here.]

CONCLUSION

The conclusion should directly answer the study objective, be supported by the findings, and avoid introducing new results.

[Insert Conclusion here.]

DECLARATIONS

For double-anonymous review, declarations that identify authors, institutions, funders, or ethics committees may be provided on the separate Title Page during review and inserted into the main article after acceptance, according to editorial instructions.

Acknowledgements

If any, please write in this section. Acknowledgments are only related to the source of research funds by writing the contract number. Example: This work is supported by Hibah PITTA 2018 funded by DRPM Universitas Indonesia No. 1840/UN2.R3.1/HKP.05.00/2018.

Author Contributions

[State each author's contribution. The journal encourages use of the CRediT contributor roles where appropriate.]

Funding

[State all sources of financial/material support and grant numbers, or state that no specific funding was received.]

Conflict of Interest

[Disclose relevant financial or non-financial competing interests, or state that none exist.]

Data Availability

[State where and under what conditions the data supporting the findings are available, or explain applicable ethical/legal restrictions.]

Generative AI Disclosure

[Disclose relevant use of generative AI/AI-assisted technologies in accordance with NJK policy, or state that no disclosure is required.]

REFERENCES

Include a minimum of 25 references. References should be relevant, accurate, and primarily drawn from peer-reviewed scholarly sources. Prioritize recent literature (generally within the last five years), except for seminal theories, foundational methods, original instrument-development papers, or other essential older sources. Use APA 7th edition as currently required by NJK. Include DOIs where available and ensure complete consistency between in-text citations and the reference list

[Insert references here. Use a reference manager such as Mendeley, Zotero, or EndNote to improve consistency.]
