EMS Training & Recertification

World's most convenient EMS training

We believe you should never settle for less. Most medical education organizations focus on stale, inefficient, and bureaucratic minimum standards.

Currently, you go to a course, you sit for so many hours, and you go home with a certificate.

You deserve better. Your patient deserves better.

We believe you should access education when and where you want it. You should receive engaging content. You should walk away from your educational experience as a better provider and be excited by your membership in the medical community.

Our commitment to you is that we will never stop innovating and refining content to deliver the best educational experience possible.

IA MED EDUCATION

We build our content from the ground up, point by point. Using our proprietary instructional design process, we differentiate ourselves by creating accurate, simple, practical and intuitive, beautiful, and inspiring curriculums.

IA MED AGENCIES

Partnerships built to last.

With IA MED Agency Solutions, you are not only a client; you are our partner. We approach your success as an enduring mentorship, and we want to assist you with every next step.

We build our partnerships by constantly exceeding expectations. We take pride in our professionalism, transparency, and trust. What you see is what you get.

A direct line to our staff.

We will always stand by the importance of trust and communication.

Current and prospective agency partners feel free to reach out directly to our Agency Team at any time via email at agencies@iamed.com.

Flight Medical Provider

The definitive online, on-demand prep course for the industry's most challenging exams: the Flight Paramedic Certification (FP-C), Critical Care Paramedic Certification (CCP-C), Critical Care Transport Registered Nurse (CTRN®) and Certified Flight Registered Nurse (CFRN) exams! Advance your clinical knowledge and learn the fundamentals of critical care transport and advanced pre-hospital medicine from the comforts of your home, station, or base – on your schedule.

Critical care transport is a highly-competitive industry, and to become a Flight Medical Provider™ you have to be the best.

Since 2011, our program has helped thousands of students launch careers as flight paramedics & flight nurses by providing the most comprehensive, flexible, and accessible critical care education in the nation.

The Flight Medical Provider™ On-Demand course allows you to access the knowledge and your courses from the comforts of your home, station, or base!

By presenting complex medical concepts through straightforward instruction, we make learning critical care simple – regardless of your current medical ability or experience.

Our unique approach to advanced medical education has made IA MED® the industry-standard and a fan-favorite among flight paramedics and flight nurses.

Register to become a Flight Medical Provider™ and earn your wings.

EMT Refresher

With our all-new EMT Refresher course, you will obtain 40 hours of continuing education for an all-in-one recertification solution!

Recertifying your EMT certification can be overly complicated. Stressful. Expensive. Full of guesswork. And let's face it, downright boring.

We've all been there, cycle after cycle, forced to sit in that death by PowerPoint presentation that just doesn't fit into your schedule. Or maybe this is your first recertification, and you're just not sure where to start.

Not anymore!

We guarantee with our course that you will not only have enough hours to recertify, but you will have learned new things to use in your practice!

You get to focus on the evidence-based medicine and thought-provoking topics presented by our staff of world-class instructors and handpicked industry leaders.

Just because the standards are outdated doesn't mean that your education needs to be!

Let's Talk Specifics.

The National Registry of EMTs (NREMT) requires you to complete 40 hours of continuing education every two (2) years.

To meet these hours with our course, you will receive a learning path with on-demand and self-paced classes to meet the education requirements in the distributive (DE/F3) format.

Our EMT Refresher course will provide you with the hours to meet the following requirements:

20 CEUs for the National Component

10 CEUs for the Individual Component

10 CEUs for the Local Component

Details.

- Includes the 40 CEUs required from the NREMT
- Meets all standards for NREMT certifications expiring in 2022
- All online and self-paced continuing education
- 2 full years access
- Instantly downloadable education certificates

Accepted by:

CAPCE, NREMT

(Please check with your state to ensure this course is accepted for State/Local requirements.)

Why IA MED?

We built our EMT Refresher course with you in mind! Our goal is to remove barriers in obtaining your education to make you a better provider.

All of our courses are designed and developed exclusively by industry members.

Our team is derived from tactical medicine, helicopter emergency medical services, 911 services, and critical care, giving us the ability to provide education from different perspectives.

We understand that our most valued asset is YOU! Here we not only ask for your opinions, but we also hear your feedback and then put it into practice.

Answers to All Your Questions

Will this meet all of the requirements for my NREMT recertification?

Yes! Inside your learning path, we will assign you 40 CEUs of continuing education courses that you must complete for your recertification.

Since the NREMT is not requiring live education for those recertifying in 2022, we have removed it from our course requirements.

Is this course accredited?

Yes! All IA MED courses are accredited by Commission on Accreditation for Pre-Hospital Continuing Education (CAPCE), meaning you can apply your credits earned to most state and national certifications.

Does this course have any live education?

Our EMT Refresher course does not have any live education within the course requirements.

Due to the NREMT removing the distributive education limits those students with NREMT certifications expiring in 2022 can recertify completely with online only education.

NREMT Distributive Education Update

“Distributive Education limits removed for the recertification cycle ending March 31, 2022 (EMT, AEMT, Paramedic) and September 30, 2022 (EMR).

All EMTs, AEMTs and Paramedics due to recertify on March 31, 2022, will have no limits on Distributive Education. The same will apply to EMRs due to recertify on September 30, 2022. This allows all Continuing Education to be accomplished online through any state-accepted or CAPCE-accredited program or education site. Of course, in-person continuing education will also be accepted.”
