

Digital Forensics 2

(SPY 2010)

Assignment 2

Submitted By-

Your Name

University Number: **123456**

Submitted To-

Dr. Mohammad Shoab
Department of Computer Science
Shaqra University

Instructions:

- *The assignment must be handwritten.*
- *Use A4 papers to write the assignment.*
- *Draw diagrams wherever relevant. Explain your notations explicitly and clearly.*
- *An incomplete assignment is NOT acceptable for submission.*
- *Arrange all the papers of your assignment into a file to submit.*
- *Once you submit your assignment, you will be expected to answer all the questions there INDEPENDENTLY. You may be asked to answer any question of the assignment in class.*

- Q1. Describe the challenges of conducting forensic investigations in cloud environments. How do forensic processes differ in Infrastructure as a Service (IaaS) vs Software as a Service (SaaS) models?
- Q2. What are the major steps involved in performing a forensic analysis of a mobile device? Discuss the limitations that forensic investigators face when handling encrypted or locked mobile phones.
- Q3. Explain what Industrial Control Systems (ICS) are. What makes forensic investigations in ICS environments different from traditional IT forensics?
- Q4. Identify and briefly describe three emerging trends or challenges in the field of cyber forensics. How are these trends shaping the future of investigations?
- Q5. Choose a real-world cybercrime case and analyze it from a forensic perspective. Discuss the digital forensic techniques used, challenges faced during the investigation, and the outcome of the case.
