

Fun, Family Activity

This year we would like to introduce something new to One School, One Book. Many of the students here at MCE have shown a great interest in STEM, so we thought we would incorporate it into our book. As you read further into the book, a couple students create a maze for Ralph to go through. So we invite you, as a family, to create your own maze. Don't feel that you need to go out and buy a bunch of materials for this, that's the fun part of STEM, being creative with what you already have at home. This is completely optional, but we would love to see what everyone comes up with. We invite you to share your designs either by taking a picture or by bringing your maze to school. We would love to see what you have created by February 20th. We have included a couple ideas to show that it doesn't have to be complicated or use lots of different materials.
