

FEDERAL CERTIFICATION EVENTS:

Federal Cyber Certification Series 2026

November 2-3 | Renaissance Arlington Capital View, Virginia, USA

Where Compliance Policy Becomes Product Reality

The Federal Cyber Certification Series brings together government and industry leaders to help ICT product developers and integrators navigate evolving requirements across IoT cybersecurity, software supply chains, cloud authorization, and post-quantum cryptography. Gain practical guidance on certification pathways, compliance readiness, and the US and global standards shaping technology procurement and market access.

IoT Cyber Compliance Day 2026

Navigating US and global cybersecurity requirements for connected products, including certification, secure product development, and vulnerability management.

2 November | Renaissance Arlington Capital View, Virginia, USA

www.FedCertWeek.org

SW Supply Chain Day 2026

Addressing software bills of materials (SBOMs), secure development, software transparency, and vulnerability management to strengthen supply chain assurance and procurement readiness.

2 November | Renaissance Arlington Capital View, Virginia, USA

www.FedCertWeek.org

FedRAMP Day 2026

Exploring FedRAMP modernization, assessments, authorization, automated compliance evidence, and continuous monitoring for cloud products and services.

3 November | Renaissance Arlington Capital View, Virginia, USA

www.FedCertWeek.org

PQ Cyber Action Plan Day 2026

Building a practical roadmap for post-quantum cryptography migration, including cryptographic inventories, certification considerations, supplier readiness, and evolving compliance requirements.

3 November | Renaissance Arlington Capital View, Virginia, USA
