

Golf Scores

Download the [GolfScores.xlsx](#) file and open it with Microsoft Excel.

All cells shaded **green** must be solved with a formula. For this assignment, we will be solving for the MIN, MAX, AVERAGE, MEDIAN, and MODE of different cell ranges. Here are the appropriate formulas:

Minimum	=MIN(First Cell, Last Cell)
Maximum	=MAX(First Cell, Last Cell)
Median	=MEDIAN(First Cell, Last Cell)
Mode	=MODE(First Cell, Last Cell)
Average	=AVERAGE(First Cell, Last Cell)

What about Mean? Well, Mean means the same thing as Average, so just use the Average formula!

If a cell is shaded **yellow**, it must be answered, but not with a formula.

FAILURE TO USE FORMULAS WILL RESULT IN A ZERO!
