Solving Problems in communities is most important to me because it makes communities better places to live. My name is Nakityo Joanita, a student at Makerere University pursuing a bachelor's degree in Software Engineering. I'm a highly organized Ablesolver graduate who always takes notes and keeps a clean workspace. I find this increases efficiency and also helps the rest of the team stay on track, too. I love meeting new people, learning about their lives, backgrounds and making them comfortable in my presence hence serving as a chairperson for Mentorship club Makerere University.

Work Experience

Currently, I'm a facilitator and developer advocate at Ablestate Creatives Ltd and actively involved in web creative design and development.

Jan 2022 I have done data Analysis to extract useful information from data and make the decision based upon the data analysis through cleaning the data and modeling it into diagrams like pie charts, histograms, bar graphs.

Sept 2021 I participated in a Hackathon called Women In Fintech Uganda organized by HiPipo in collaboration with Mojaloop, Level One Project and Include Everyone where we were bringing together business and finance and our team was the first runner up. We are working on a product called Alfasente. This opened my mind to an open source software called Mojaloop.

Aug 2021 I joined Medium and became a medium writer to post some of my writings. I have written articles such as React, Node, Personal involvement at Ablestate. This has helped me show more of what I'm currently working on and learning through my blog posts.

Nov 2020 I enrolled in Coursera with the help of the African App Launch Pad scholarship. For the course called Web design For Everybody and this has helped me learn HTML, CSS, JS which I use to design and build responsive websites.

Core Values

Team work

Through the hackathons, I have managed to efficiently work in teams hence contributing to positive outcomes.

Effective Communication

I practice timely and clear communication with everyone involved in the activities I am part of, and it helps me in planning, organizing and leading.

Committed

Nov 2019 I became the president of Makerere University Mentorship Club. We have held all round sessions with our mentors such as self-branding, self-imaging, self-awareness, savings, and investment among others. These have motivated and encouraged us to be persistent and committed to whatever we do.

Skills

HTML, CSS, JavaScript, Python, ReactJs, Bootstrap, Python, C, MongoDB, SQL, Fetch APIs, NodeJs , Express, Java
