

Initial Load

Searching:

- Searching from Library Homepage via widget:
 - Buffalo State, tested 6/17/19 at 1pm
 -
- Search in Everything: art and it's slow. Facet Availability to: available online and it's slow
Facet Content Type to: Audio Visual and it never resolves. Interestingly, I find that if I facet first by Content Type and then by Availability -- it's speedy! [Nancy Babb reported this earlier this year. I tested it in UB's catalog from a GCC pc and it wasn't that bad. Searching same in GCC was pretty speedy and got the same number of results.]
