

Welcome!

Provie's Recommended Heiron Listening Order

Laying out the seasons of Heiron in a listening order that keeps chronology while also listening to an entire party's arc together, for ease of comprehension! Essentially this is mostly just listening to alternate episodes, but there's enough points where it's broken up or there's a shift where I wanted to make a guide. This listening order is also essentially how FATT breaks up the other 2 party seasons in later games, so this listening order is now their typical "style" for seasons!

Links are all to the episodes on the Friends at the Table Site itself! (which is how I listen)

On the order of Seasons

Of course, the Seasons are in the general order of the seasons! But Marielda can slot in a few places! Any of these options are great, just depending on what vibes you want.

1. Information Unfolding as it Originally Was Vibes: Marielda can be listened to after completing Autumn in Hieron, as listed on the document tabs. This was where I put it during my re-listen, as putting it before Autumn may be a lot of information to absorb at the beginning of Hieron, and the differences in "technology"/society in Marielda may set a tone that clashes with Autumn
2. True Chronology Vibe: Marielda can be listened to before any of the Seasons of Hieron, as chronologically it does happen first! Going into Hieron after Marielda could be fun, as it will introduce some of the concepts that became important in the game as it goes on
3. POV of the Hieron PCs Vibes: Marielda can be listened to during Winter in Hieron, as this is where the characters hear the story of Marielda, and listening here will connect the dots about stuff at the same time the characters do

On the order of Parties

In the list, the parties are listed in order of the first posting of that section, [ex: Boat Party starts at Episode 5, Ice Party at Episode 6, so Boat Party's section is listed first] but in most cases it doesn't matter which party's selection of episodes you listen to first. All sections of divided parties note that the other party in the section may also be listened to first.

Should I read all the text/show notes?

On a first time listen, I would recommend reading the show notes. I don't think they have anything especially plot relevant, though they do tie together some threads for the game, you won't be missing anything vital if you skip them, so they are optional. The show notes do provide certain insights and expansion and flavor of the world, which is a nice accompaniment to a first listen. When re-listening to FaTT I often skip re-reading the show notes but sometimes I peek through them again. Good stuff, but not required reading.
