

This rubric can be used to grade all medical procedures **EXCEPT** for medical report and research paper.

	Formatting	Content	Summary
Phenomenal (5)	Log is presented in a neat and clear format. It is very easy to read	All questions and body components of the log are medically relevant and accurate. They are well thought out and help to improve our understanding of the patient's state of health (ex. Endurance test ratings are all accurate)	Goes beyond basic reiteration and provides an in-depth cross-examination. All critical aspects of the procedure are addressed. Comprehensive analysis and next steps provided.
Exceptional (4)		Most questions and body components of the log are medically relevant and accurate. There are minor flaws present	Provides a sufficient overview of the patient's responses. Most critical responses were addressed in the summary. Some analysis and next steps are present
Acceptable (3)	There are multiple formatting issues with the log, however, it is still readable. Improvements could be made to improve readability. Inconsistencies are present	Some questions and body components of the log are medically relevant and accurate. Flaws are present but it does not compromise the log's integrity or completeness	Some of the patient's critical responses were not addressed in the summary. Summary restates findings without analysis or next steps
Fair (2)	Log is unreadable. Sections are not separated and headers are missing.	Few questions and body components of the log are medically relevant and accurate. Major flaws are present which compromise the log's integrity/completeness.	The summary is complete but fails to address a lot of what happened during the procedure. Irrelevant information is included
Poor (1)		No components of the log are medically relevant or accurate	The summary is incomplete (falls below sentence requirement) and barely touches upon what happened during the procedure. Irrelevant information is abundant
Weight Factor	Wellness Check: Max 1 pt (Full marks if at least acceptable) Endurance Test: Max 2 pts Standard Checkup, Psych Eval, AEME, APE: x1 Health Assessment: x2	Wellness Check: Max 2 pt Endurance Test: Max 3 pts Standard Checkup & Psych Eval: x1 AEME, APE: x4 Health Assessment: x5	Wellness Check: Max 2 pts (Full marks if at least acceptable) Endurance Test: x1 Standard Checkup, Psych Eval, AEME, APE: x2 Health Assessment: x5
Additional Deductions	- Missing Credentials: Log invalid - Others at the discretion of the grader	- Poor SPaG - Others at the discretion of the grader	- Informal Tone - Others at the discretion of the grader
