

Math:

Tuesday, February 7th is the 100th day of first grade! I can't believe how quickly the year is flying by! As part of our celebration, the children can dress up as their 100 year old selves! Dressing up is optional.

Science

Family Science Tracking Daylight

Each month of the school year, you will keep track of whether it is **light** or **dark** outside when you wake up, go to school, eat dinner, and go to bed. Write the month and the date of your observation. Circle either light or dark for each time of the day.

Month: _____ Date: _____

Woke Up	Went to school	Ate dinner	Went to bed
 light	 light	 light	 light
 dark	 dark	 dark	 dark

Tomorrow, I will send home this tracking daylight homework. Please have your child complete the homework and return it by Thursday, February 9th.

Valentine's Day

Last week, the children made a list of names of the students in 1H. If your child is making Valentine's, please have your child make a Valentine for every child in the class.
