

DV01K Camera 1.2.4

Affected solutions: DV01K Camera app

Release version: 1.2.4

Release date: 2024/07/15

[Major Changes]

The BenQ Camera app has been renamed the DV01K Camera. The app icon has also been updated to reflect the change. The app can only be used with the BenQ DV01K camera and does not support other camera models. Downloading the update allows you to install the latest firmware version. For details, see the **DV01K firmware 2024.6.12.19.11.0** release notes.

[Enhancements]

Added support for the following languages: Catalan, Euskera, Malay, and Slovak.

[Update Instructions]

This update requires manual installation through DMS or on the BenQ Board.

Updating the DV01K Camera app from DMS

1. Go to <https://dms.benq.com>.
2. Log in with your admin credentials.
3. From the main menu, click **Apps** → **BenQ Apps**.
The list of available apps appears.
4. Locate **DV01K Camera**, and then click **Install**.
5. Select to install by devices, groups, or tags, and then click **Next**.
6. Select the specific devices, groups, or tags, and then click **Select**.
A confirmation message appears.
7. Review the information, and then click **Confirm**.

Updating DV01K Camera from the BenQ Board

1. On the home screen taskbar, tap  → **BenQ App Store**.
2. Tap  → **DV01K Camera**.
The app details window appears.
3. Tap **Update**.

Tip: If there are other available app updates, you can install them simultaneously. Tap  then **Update All**.
