

Dear Eighth Grade Parents,

The placement test for Omaha Catholic high schools is approaching quickly!! It is time for students to put some thought and effort into preparing for this exam. My name is Anne Determan, and I am once again offering a class to help them start this process.

The class will focus on test taking strategies as well as reviewing the topics that will be on the exam. We will cover quite a bit of material with the review and will spend time practicing test questions and going over the solutions. This is helpful for the whole range of students from those seeking a scholarship to the students who may struggle.

My background is in math. I graduated from Creighton with a BA in mathematics & secondary education. I spent 8 years teaching and I currently have a busy math tutoring business for 5th-high school students. I also tutor students preparing for more advanced tests including the ACT. Your students know me - I am a sub at MOQ.

The class will consist of 5 one-hour sessions held December 8th-12th from 3:20-4:20 PM in an MOQ classroom. The cost is \$80. The book students will need for class is: Barron's HSPT 2nd edition. It's available on amazon. I don't have extra copies and sharing isn't a good idea.

[PLEASE order the book as soon as you register!!](#)

You can sign up for the class by sending me an email. My address is: annieloo86@gmail.com
Payment can be check, cash or Venmo. Students can bring payment on the first day of class.
Please note the name of the student on the envelope/check/Venmo

Let me know if you have any questions! My cell number is: 402-850-0575.

Sincerely,
Anne Determan
