Program: The NETworking is hosting its fourth conference made by the people for the people. That is our culture, a culture of English lovers supporting one another and developing together. In fact, culture is our topic for this conference. But what is culture? Our speakers will talk exactly about that!:) As a teaser I can say that culture is the atmosphere of your school and in the classroom. Culture plays a vital role in team building both for the teachers and the students in the classroom. So much more could be said about corporate culture and school culture and teaching culture and culture in general.

PS Nizhny Novgorod is the Cultural Capital of Russia this year so come share about culture in the Cultural Capital!;)
