

Screencastify

Install [Screencastify](#) from the Google Web Store

Enable Screencastify

Set up camera access

Allow microphone

Choose where to store your recordings

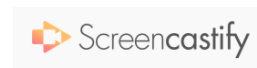

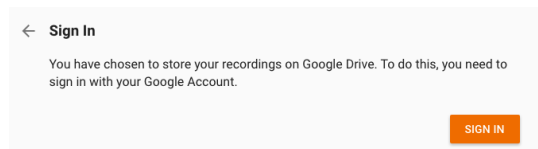

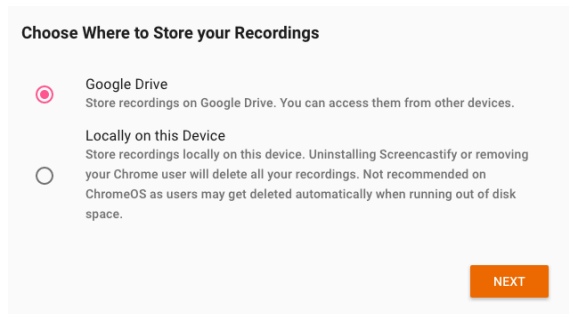

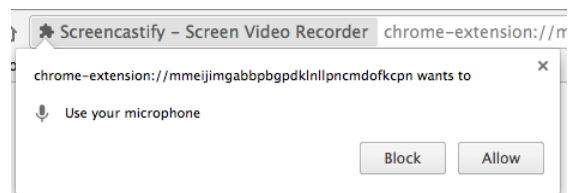

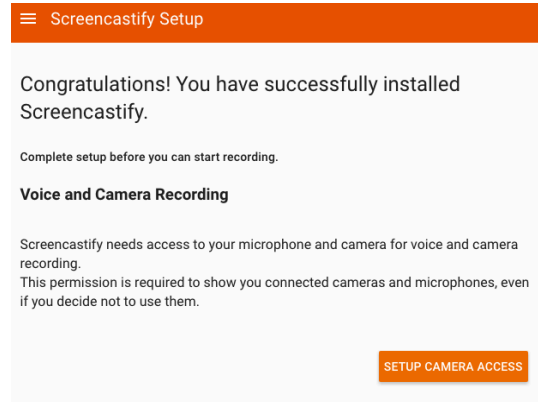

If you choose Google Drive you will have to sign in.

I strongly recommend this option.

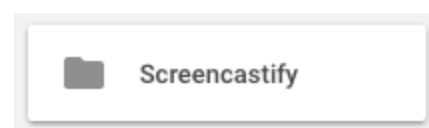

Screencastify will create a folder for your recordings, in Google Drive.

This folder can be shared.

Screencastify is now set up and ready to use.

MY ACCOUNT

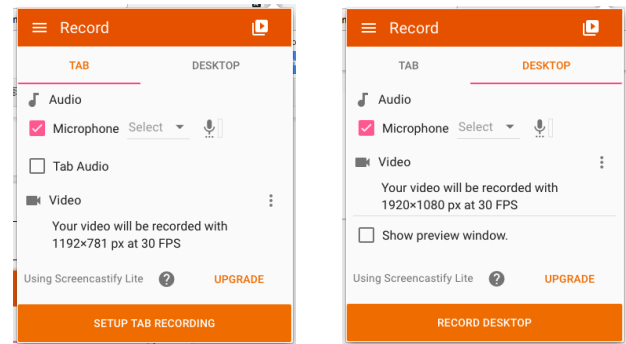

Select the icon from the Google Extension Bar.

Set Tab Recording

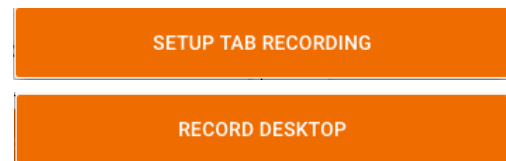

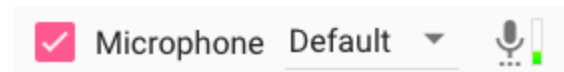

and / or

Desktop Recording

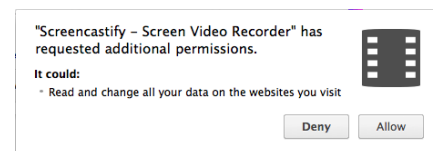

If you are using an external microphone or headphones / earbuds with a microphone, you should select them from the Microphone list.

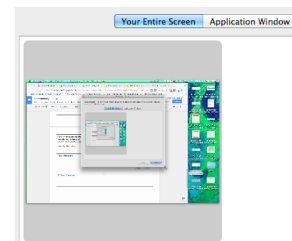

Setup Tab Recording
and / or
Record Desktop

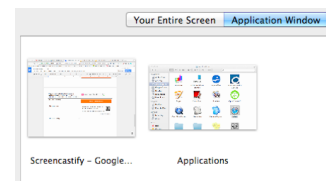

You may have to Allow permissions

Determine whether you will be sharing your entire screen

Or, Application Window

Once you have it set up you will see different buttons in the icon.

You are ready to record!

The Lite Version (Free Forever)

10 minute recording limit per video
50 videos per month
