

Compliance Calculator

Privacy Policy

The Compliance Calculator has no built in functionality to collect personal data of any kind. The program simply takes in a set of numbers and makes a calculation for communication space depending on the scenario given. There is no situation where this program will ever be used to collect user data now, or in the future.

Disclaimer

The Compliance Calculator uses OSHA & NESC guidelines to make its calculation 40" below power on utility poles & 30" below power in the midspan run. Ensure that these measurements are code where you are working before using this product.
