

Name:

Period:

Year	Global Population	Amount of food needed per city	Food Collected: City 1	Food Collected: City 2	Food Collected: City 3	Food Collected: City 4
2020	7,795,000,000	2				
2030	8,548,487,370	4				
2040	9,198,847,382	6				
2050	9,735,033,900	8				
2060	10,151,469,683	10				

If we cannot control population growth as a world, how can we increase food production for farms? Discuss as a group and list as many ideas as you have in the box below:
