

Annual Notice

Education for Employment (E4E) AND Academic & Career Planning (ACP) Services for Students

The Education for Employment (E4E) Plan with consolidated ACP programming is linked [HERE](#).

As required by the Administrative Code and 115.28(59) and 121.02(1)(m) of the state statutes, each school district must have a long-range E4E plan approved by the Board of Education. This plan must be updated annually and include a process to engage parents in their student's academic and career planning. The linked plan was approved on June 17, 2024.

Northern Ozaukee School District (NOSD) will utilize our comprehensive K-12 career awareness programming to guide all students on the development, implementation and revision of their academic and career plan. Directed by the Warrior Path, our students will engage in collaborative connections in school and in the community, attain academic and career (credentials, milestones), develop and demonstrate personal agency, and enhance their world and themselves through reflective service learning.

It takes a committed community of parents, community members, academic, industry and organization partners and other stakeholders to support the comprehensive development of students. NOSD is committed to collaborating with all stakeholders by providing regular information and access to opportunities. Utilization of weekly school-based newsletters, parent information nights, ACP and scheduling conferencing, family events, student seminar and capstone presentations, and various career-based learning experiences foster meaningful partnerships.
