

DOK Level	1	2	3	4
	Recall: Recall of a fact, information, or procedure	Skills/Concepts: Use information or conceptual knowledge	Strategic Thinking: Reasoning, developing a plan; more than one possible answer	Extended Thinking: Investigation, time to think and process multiple conditions of a problem
Overarching Drive	Knowledge to Name Name to Purpose	Purpose to Concept	Concept to Reasoning	Reasoning to Extended Thinking
Intended Outcome	Name what was learned	Select information (from a learned concept-purpose) and use it to identify a new concept	Use a previously learned concept/idea to solve a new problem strategically	Use a previous conclusion and compare it to other sources to develop one conclusion that is applicable across other contexts or domains.
Steps of Complexity	1a. Define the name 1b. Show how the name (concept) is used within context (its purpose).	1. Decides on needed information and selects it... 2. In order to identify and verify the new concept.	1. Develops a strategy to find evidence contributing to a conclusion . 2. Shows how the strategy was used to solve the problem. 3. Justifies and explains why they chose to solve it this way.	1. Compares previous results/conclusions to other sources. 2. Develops a new or confirms a generalized statement or conclusions 3. Show how the conclusion can be used in other ways . 4. Solves a new problem in a new way or has a new perspective.
