Directions:

1.	Select a 150 word passage
2.	Count the number of one-syllable words in that passage
3.	Use the formula **RGL = 20 - (Number of one-syllable words ÷ 10)** to determine reading grade level (RGL)
4.	Repeat steps 1-3 for ten passages from various locations in the textbook, then average the RGL's to obtain the average reading level for the textbook

	NUMBER OF ONE SYLLABLE WORDS		**PASSAGE PAGE**		**CALCULATIONS 20 - (number ÷ 10) ➔➔➔➔**		**RGL**
1 =							20
2 =							20
3 =							20
4 =							20
5 =							20
6 =							20

7 =							20
8 =							20
9 =							20
10 =							20
					TOTAL RGL =		200
					RGL FOR TEXTBOOK (RGL/10) =		**20**
