

Project Scope Statement

You and your team are planning and executing the building of a structure with the food items provided. You will be evaluated on how well the project is managed and the quality of the structure, this is an activity based on communication and collaboration. You have 20 minutes to plan your structure. You will then have 30 minutes to build your structure. The project plan must be completed and turned in to the judge after you have finished building your structure.

Team Name:

Team Members:

Project Work:

What work does the project involve?

Product Description:

What are the project deliverables, what will you build?
