

“Quick tip for your website”

Hey “Name”

I hope you are doing well.

I have gone through your social media and was amazed by the quality of your work on your platform.

The reason I am emailing you is because I want to help grow your brand and get more sales

I did some research on your top competitors and I have a good idea for how I can help you to beat them.

I Believe if we start tweaking a couple of things with your messaging and change your website a bit we can really help spread your message and get more people to start.

Just my suggestion, let's have a call because there are a lot of things to talk about!

Thank you for your time

Take care

Jawad Ghulami
