Cyberbullying

What is cyberbullying?

Cyberbullying is a form of bullying that takes place online and can take many forms, such as sending malicious messages. Cyberbullying can happen at any time of the day, so often feels unrelenting. It can take place across many different platforms, such as on messaging apps like WhatsApp and Snapchat, on social media platforms such as Instagram and TikTok and via online games. Here are some examples of what cyberbullying can look like online:

Wonderlab+

Are you looking for something fun to do online with your child? The Science Museum group have a wide array of activities, games and quizzes on their website:

<https://wonderlabplus.sciencemuseum.org.uk/home>

- Sending nasty or hurtful messages
- Leaving unkind comments
- Sharing photographs of somebody else without their permission
- Excluding somebody on purpose
- Impersonating somebody with a fake account
- Telling/sharing lies
- Blackmailing

What should I do if my child is being bullied online?

If your child is being bullied, then try to stay calm and let them know that it is not their fault. It is always useful to keep evidence of any online bullying and inform their school so that they are aware. Show your child how to block and/or report any users/content and review their privacy settings to limit what others can see. You may also wish to review/set up any available parental controls.

Further information

Minecraft

Minecraft is rated as PEGI 7, meaning it is suitable for those over 7 years of age.

Minecraft is a game where players can create worlds using blocks. There are two different modes – creative and survival. In creative mode, users can build what they wish and have unlimited resources whereas in survival mode, players must gather resources, find food and defend themselves against mobs. Survival mode may include mild violence and scary characters.

There is a vast amount of information available online about cyberbullying. The following links provide further information on types of online bullying, and who you can contact if you need any further advice or support.

Roblox New parental controls

ability is entered into. Current as of the
es not imply any affiliation with car
os, and does not contain any unauthorized
linked materials.

What is Roblox?

Roblox is a platform consisting of a collection of games. Players can either create games or play games that other users have created. It is free to download (however subscription options and in game/app purchases are available) and can be played across numerous devices.

A lot of the content is user generated, which may mean not all games will be suitable for your child to view/play. If your child is playing Roblox, it is important to monitor what your child is accessing and set up appropriate parental controls.

PEGI rate Roblox with a Parental Guidance label, this is because it is difficult to rate due to the huge level of user generated content.

New Parental Features

Roblox have released three new parental controls for your child's Roblox account. These are:

JustTalk

1. **Friend blocking** - you can now block anyone on your child's friends list that you do not want them direct messaging.
2. **Experience blocking** – you can now block any specific experiences (games) that you do not want your child to access.
3. **Top game insights** - you can now see the 20 experiences (games) your child has spent the most time on in the last week.

You can find out more here: <https://corp.roblox.com/newsroom/2025/04/new-parental-controls-for-roblox>

Further information

You can find out more about Roblox here:

<https://en.help.roblox.com/hc/en-us/articles/30428248050068-Parental-Controls-FAQ>

Users can use this app to video chat, call and text. There are two versions – JustTalk and JustTalk Kids with both versions having the option to unlock further functions via a premium subscription. JustTalk is rated as 12+ and JustTalk Kids is rated as 3+ on the App store.

Even though the apps may be rated as appropriate for your child, there are still risks in using either version.

Ask Silver Scam Checker

Ask Silver is a tool that anyone with a smartphone can use to protect themselves from scams. To use the service, you will first need to sign up and then you can simply upload a screenshot of anything that you are unsure of, and think could be a scam. Ask Silver will let you know whether they think it is safe or not. Find out more here:

<https://www.getsafeonline.org/asksilver/>

The Ineqe Safeguarding Group provide an overview of JustTalk, including the risks you need to be aware of:
