

Project Name: Women Hub

Problem Statement: There is no platform where any women can get all the opportunities, contests, and read inspiring stories of women which are especially run and organised for women.

Solution: Yes, this is the fact that such programs that are specially organized for women have worked a lot in the upliftment of women but still there are many girls and women who didn't come to know about such opportunities.

So, we developed a platform that totally concentrates on the upliftment of women where any woman can browse and register.

When you visit this platform you will see the following:

1. Inspiring stories of women
2. Opportunities(Job/Internships) from every sector
3. Challenges/Contest

On registering yourself you get the opportunity to :

1. Post yours or any other inspiring stories/blogs
2. Post Job/Internship offers of your company or another company that you think every woman should know about.
3. Post Challenges which are happening around the world.

Join
WomenHub,
And be a part of our
community.

USP: Every opportunity and challenges which are especially for women can be found at a single platform.

Also, get inspiration from others by reading their success stories.
