lidded jar rubric

Grade/comment	5	4	3	2-0
I can create a two peice lidded jar thickness on the potter's wheel that is at least 4" tall and 3" wide. It will be pulled up and have a consistent wall				
I can make a base and a lid that fit securely together and are in proportion.				
I can trim (foot) the lid				
I can glaze the project so that the form is enhanced and there is no glaze on the foot ring. I can glaze the lid and jar together so they don't stick.				
I can design and create a unified project of two pieces where the color, surface design, edge and all sculptural details will enhance the whole by reflecting or contrasting with the form.
