Technical Roadmap

- Working document: [w 2025-06-16 LEAPSroadmap_update2025_v2.1.docx](#)
- Gant chart like table: [x ExpContSig LEAPS-TR_table_WG3_edit.xlsx](#)
- Initial roadmap: [x LEAPS_Technology_Roadmap_update2025_v1.0.xlsx](#)
- Roadmap experimental control: ...
- Oscar: “roadmaps” usually have start date, end date, and milestones in between. Are we supposed to deliver this? Currently the working document discusses “fields”, but without timeline – Paul: timeline is separate in the google spreadsheet – Oscar: we could describe state of the art and a future goal
- Deadline: asap (hard deadline end september, but including approval of directorates and summer holidays) – further coordination beginning of next week (approx 2025-07-01)
- Francesco: many preparatory work for roadmap; check if all previously mentioned keywords are already used in the working document
- Paul: check for possible cross-references of other sections to IT
- Contributing: add comments, no direct changes to the text
