

Instructions to connect your device to the projector in the RSC Feature Gym

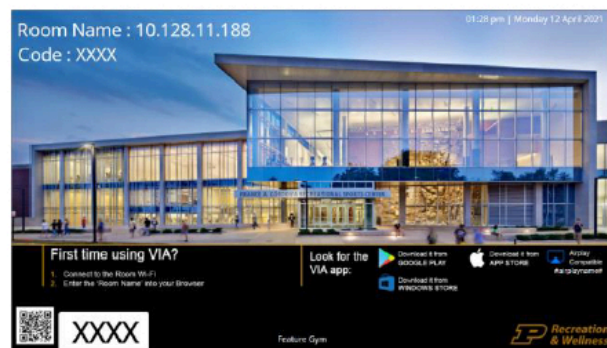

Room name: 10.128.16.38

Code: Keeps changing (security feature!)

You can connect to WiFi in the room using SSID “attwifi” (that is free WiFi available all through campus) or eduroam.

Using the VIA:

VIA allows you to wirelessly broadcast your screen from your phone, computer, or tablet to the projector. You will see a Room Name / URL on the top left of the screen. On your device go to your browser and type in the URL. If you do not have the VIA software downloaded, you will have the option to download it by clicking “Run VIA”. The VIA can be used through the browser, the software, or through apps.

After the Room Name/URL is selected, you will need to type in your username. Then you will need to type in the room code that is displayed in the top left of the screen (this code changes every 3 minutes). Press the present button to display your screen. When finished click stop presenting and close the browser, software, or app.

TIPS:

1. The Android app is “Kramer VIA”, and the iPhone/iPad app is “VIA Reveal”
2. If you are using an iPad or iPhone download the “VIA Reveal” app and follow the steps in the app.
3. If you are using an Android phone/tablet and need audio, please use Miracast/Screen Share on the device.
