

Lund Gathering Place Up-date:

Funding has been requested to help with some of the costs involved (landscaping and purchase of plants) and a decision is expected by the end of the year. Throughout the fall the site will continue to be prepared for planting. At this point it looks like planting will not start until late winter/early spring.

The members of the Garden Club have been asked to help support this community project by potting up, dividing or propagating plants. Following is a list of the desired plants.

Please hold onto your contributions until we have more information about timing/drop-off.

A big thank-you to those who have already promised some plants! 😊

Doug and Yvonne

Existing, desired plants:

Oregon Grape, low (*Mahonia nervosa*)
Coastal Strawberry (*Fragaria chiloensis*)
Trumpet Honeysuckle (*Lonicera ciliosa*)
Snow Berry, (*Simphoricarpus*)
Sword Ferns (*Polystichum munitum*),
