
Tattoo Aftercare Guide

Yan Tattoo & Piercing Studio

Disclaimer:

This guide is intended for clients or individuals seeking an overview of the aftercare protocols and safeguards followed by Yan Tattoo & Piercing Studio. These practices align with industry standards commonly observed in professional studios. Remember, everyone heals differently. For inquiries, please contact our reception at (437) 879-8887 for immediate assistance.

Healthy skin means a healthy looking tattoo. Follow aftercare instructions to see the beauty of a properly healed tattoo!

- **Avoid** hard liquor for the first 3 days, that might cause excessive bleeding, which leads to ink fading
- Leave your bandage/wrap for **3 days**. Avoid warm/hot water on the applied second skin.
- Wash your tattoo thoroughly (but **carefully**) using *warm water* and a **fragrance-free** soap to remove any excess/dried blood and plasma. **DAILY PROCEDURE.**
- Use a clean paper towel to dry your tattoo gently by **PATTING** the area. **DO NOT RUB.**
- Apply a *small amount* of lotion or *ointment* after cleaning your tattoo, ensure the area is **COMPLETELY** dry before applying a **very thin** layer of your chosen aftercare product/lotion to help moisturize and nourish the area.
- Moisturize the tattoo for the next **4 weeks, 3–5 times a day**, do not overload it with lotion/ointment.
- **DO NOT PICK** and pull at the **flaking/scabbing skin**, it might cause *fading* and chances of *infection* are **higher**.
- **Stay away** from the sun. **Avoid** sun exposure on your new tattoo and **do not apply** any sun lotion/sunscreen to the area until it has **fully healed**.
- **Stay away** from water other than a quick shower. **Avoid** lake water, swimming pools and hot tubs.
- **Avoid** physical work. **Do not** workout for at least 2 weeks, sweating might cause infection, irritation and fading.
- During the healing process, it will get itchy, **it is VERY IMPORTANT DO NOT SCRATCH/TOUCH.**
- Continue to look after your tattoo once healed. Keep your tattoo well protected from the sun and ensure you continue to moisturize the area regularly.

Enjoy your New Tattoo!
