

Disclaimer: This is the route I use, it may or may not be the best route, please feel free to experiment.

1. Beat Tutorial
2. Grab Observations/Tomes in the Forge and buy your gun(s), try to collect 5 orbs here if possible, but not needed. (Check out beginning of my run for route for this)
3. Do the Torment Fraud, then Go get stomp from Shakespeare
4. Make sure you grab the taco malos observation next to torment fraud and grab the Clusters for Wages 1 for 35 clusters, use these to upgrade flight
5. Head towards shakespeare's area, grab the purple orb(s) on the building just above the cliff and slightly to the left, then grab the tome on top of the circular building and then the purple orb next to the snowflake casino. Then grab the observation on the edge of the cliff looking at the castle and the one next to the snowflake casino.
6. Get Stomp (Do not do tutorial after) (you can use the purple orb(s) to upgrade the recharge/damage of stomp)
7. Grab tomes/observations. (Check out run for route i use to collect them). While doing this you can do the mayhem in shakespeare's area.
8. After getting all/most of the tomes/observations head to the twins to get blast power. You can grab one tome just outside their building without stopping and sometimes dex will spawn here.
9. After finishing blast grab the two tomes next to twins (one inside the building and one just outside next to the stairs). Then grab tomes/observations in this area. (Usually get the 4 next to the giant statue in the center of the zone). You should hit level 5 while doing this.
10. Start Dane's Loyalty now. Head outside and stomp the spire to the right of ultor building.
11. Grab any observation/tome that are left/near the activities. finish the dane activities salvation -> hellblazing -> stomp altar -> Extraction Facility and any spires near these.
12. Head to blackbeard/imp power. Grab spires on the way.
13. Note: When you hit level 6, grab melee upgrade in the weapons tab so you can get the testicular manslaughter challenge (10 kicks to the groin) At level 7 you can get Wages for Clusters 2 which gives 80 i believe, use these to upgrade stomp/flight more.
14. After getting imp power use any route you want to grab all the tomes/observations in blackbeard's area and also do the stomp altar there.
15. After getting second XP perk you can buy the first two wages for XP, this + tomes/altar & testicular manslaughter challenge should let you hit level 10.
16. Turn in Dane's loyalty. Save Dane -> Blackbeard -> Twins -> Get Aura -> Save Vlad -> Save Shakespeare.
17. While doing the above grab any spires along the way and after getting aura you can get vlad's tomes/observations as well. (there are a bunch near his castle)
18. This should let you hit 15, then go kill satan

Notes: Upgrade weapon(s) as soon as possible to get a maxed out one, kill any dex you see, and if there's a short armored vehicle drive do it because it's worth 1k XP(unless it's in blackbeard's territory because he requires you to drive to dane's). Also make sure you get bonus XP perks at levels 4 and 8. When shooting at enemies always try to get headshots as they die quicker and there is a headshot challenge (30).
