Mukund Choudhary is currently a PhD student in Natural Language Processing at MBZUAI in UAE. He is presently studying the linguistic capabilities of Large Language Models like ChatGPT. His areas of interest in NLP are low-resource languages, metalinguistic understanding, and historical linguistics. He also likes to bring in other human-intelligence-oriented fields like Cognitive Science and Psychology in Artificial Intelligence. He hopes to draw significant findings from his PhD to help make AI better and more humane in understanding language and society.
