TAKE THE PLUNGE AND EMBRACE THE MADNESS

After the normal/standard/boring 12th tourney and the series of tourneys hosted by other anons, it's time to once again embrace the idiocy and play some completely retarded ruleset. Some anons might remember Peasant Mahjong from the 6th tourney, although this time we are going to give it a little twist, since a year had passed, and catfood graced us with a bunch of new cool gimmicky options to play with. The rules are:

5000 pts start - we are peasants after all

DORAS ARE OFF

Riichi bet is worth 2000 points! Watch out for sneaky dama hunters!

Noten payments are halved to 500/1000/1500

EVERY HONBA IS WORTH 1500 POINTS

4-Kan draw is turned OFF

HEAD BUMPING IS ON

Game enters West if nobody is over 10k

Busting/Negative points are ALLOWED. You can play after falling below 0.

HOWEVER

To enable instant death and force players to be on top of their game during every moment, an alternative win condition is enabled. Getting 35000 points ends the game instantly! (yes, there is an option for that)

Uma is +30/-5/-10/-15, because only the best of peasants can ascend to nobility.

Oh, and one final thing...
