

Choir

Pop Music - In this hands-on class, students dive into the exciting world of pop music production. You'll learn how to record, edit, and mix music using modern recording tools, turning musical ideas into polished tracks ready to share as digital sound files. From capturing great performances to shaping the final sound, this course focuses on using recording technology to enhance creativity, expression, and the overall impact of music.

In addition to studio skills, students will explore the history and evolution of pop music, learning about influential artists, major styles, and trends that have shaped pop across decades. By studying how pop has changed over time, students will better understand today's sounds and how to create music that reflects both classic influences and modern styles.

Orchestra

ORCH 1 - Orchestra Level 1 offers technical and musical training and development opportunities in group settings for orchestral musicians (violin, viola, cello, upright bass). This is open to any BHS student, **even beginners!** Students become familiar with great works of music while also developing technical and personal growth. Performances after school hours are an integral part of the course and are required.

ORCH 2- Orchestra Level 2 is an auditioned course open to 10-12 graders. Auditions are held with Mrs. Sillman in March after participation in ORCH 1. This course is similar to ORCH 1, but is more advanced and faster-paced.
