

Team Member Auto Shoutout Instructions

What It Does

- When a viewer who shares a stream team with the broadcaster chats for the first time the bot will give them a special shoutout message.
- If you setup the Raids group the bot will not shoutout when a team member chats for the first time after raiding you.
 - This is because in my setup I have a separate shoutout that happens after raids so this prevents a double shoutout.
- There is also logic to not shoutout you, the streamer, when you first chat.
- This also includes a Shoutout Queue and action which include logic to automatically wait for Twitch's cooldown to pass before attempting to shoutout additional users.
- This includes a Chat Message Queue which helps prevent unintended shoutouts when you have a large number of new chatters at the same time. (Large raids, for example.)
- This will set persistent variables named **g_streamer** and **g_streamerTeams** at the start of stream to improve performance and reliability during streams.

Requirements

- You must be running StreamerBot during your stream.

How to set up

- Import the action(s) into StreamerBot using the string below.

- This is what the import should look like:

Import String

Details

Name

Stream Team Auto Shoutouts

Author

RedThePanda_

Version

1.0.0

Description

Automatically give shoutouts to fellow team members when they chat for the first team each stream.

Actions (6/6)

Queues (2/2)

Commands (0/0)

Timed Actions (0/0)

Websocket Servers (0/0)

Websocket Clients (0/0)

Name	Exists	Included	Enabled	Options	Triggers	Queue
Shoutouts (1 action)						
Twitch Shoutout	No	Yes	Yes	None		Shoutouts
Team: All (1 action)						
Auto-Shoutout: Team Mem...	No	Yes	Yes	None	1	Chat Message
Utilities (4 actions)						
Break if userName is Strea...	No	Yes	Yes	None		
checkName Not Broadcast...	No	Yes	Yes	None		
Member of Team?	No	Yes	Yes	None		Chat Message
Populate Local Cache	No	Yes	Yes	None	1	

Clear

Import

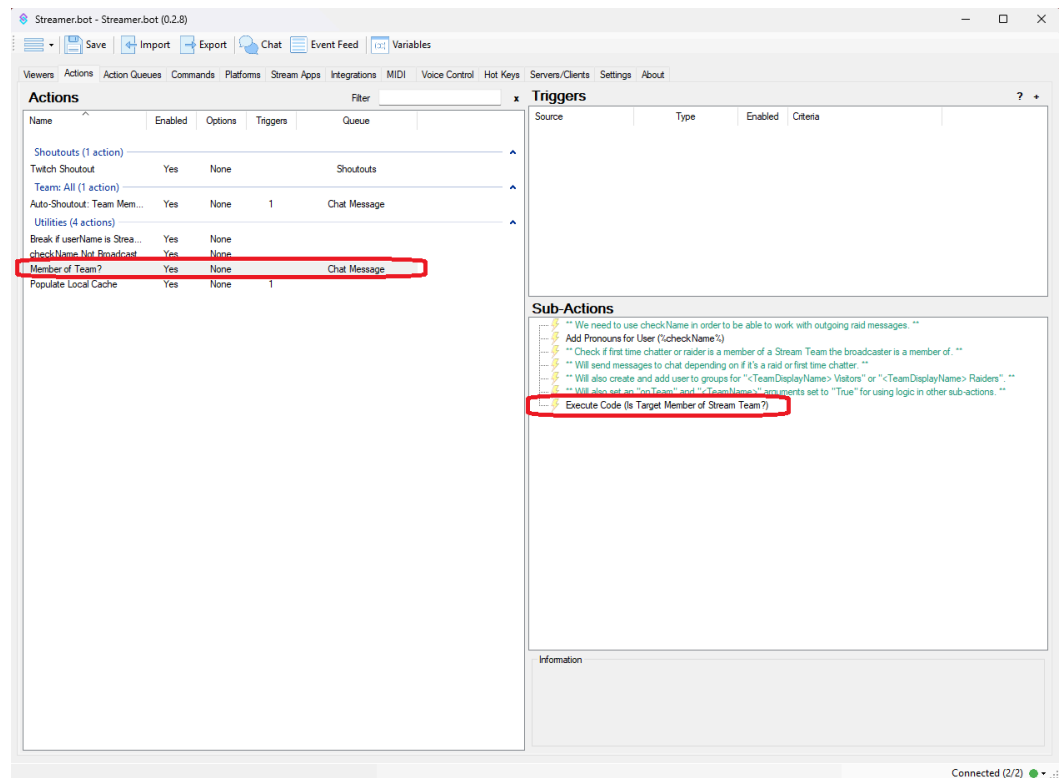

Close

- No other actions should be required on your part unless you want to modify the message. Know that doing that requires editing C#. Information on that is below.
- [Optional] Create a **Raids** group to avoid a duplicated shoutout if you already have an auto shoutout function for raids. You will need to add users to that group outside these actions.
- [Optional] Create a **StreamBots** group and add any bot accounts you use as an extra layer of protection against shouting out your bots.

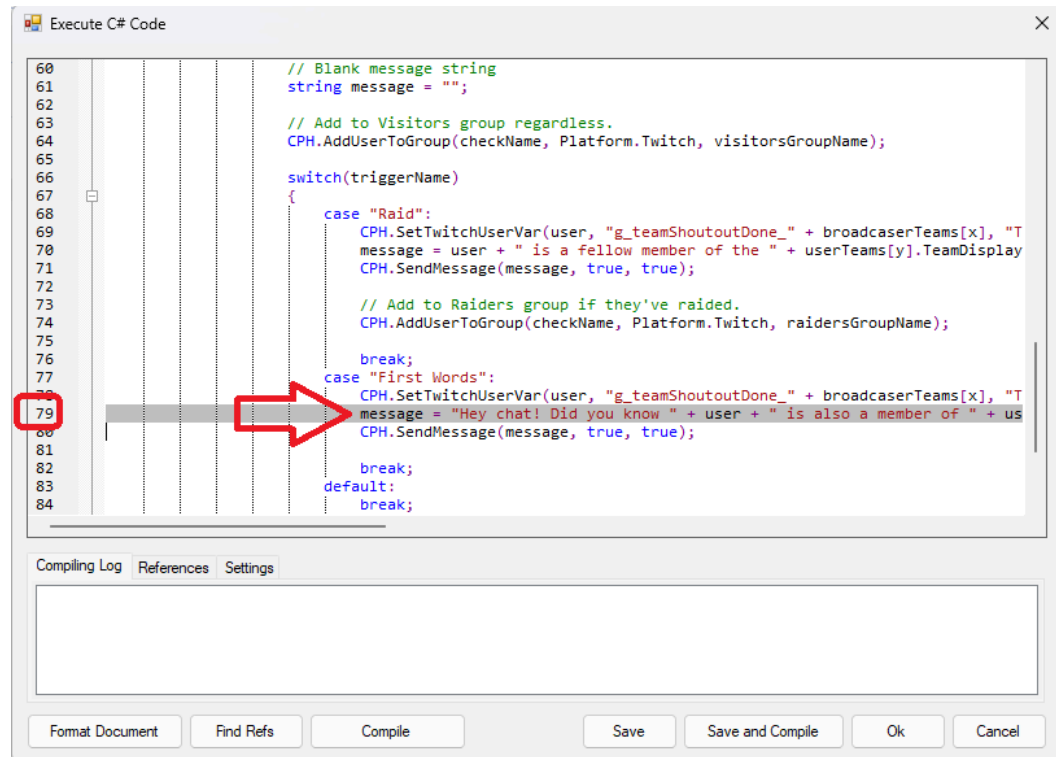

For advanced users

- Customize the chat message:

- In the **Member of Team?** action modify the **Execute Code (Is Target Member of Stream Team?)** subaction.

- Modify the message variable on line 79 to format however you like.

Import string

- Copy this and paste into Streamer Bot's import screen. (Don't include the <COPY> tags!)
