

How to find 404 external links

Google Search Console

Settings

Crawl stats

Crawl requests: Not found (404)

On the left side Go to the Settings link, then click Crawl stats>Open Report. Scroll down a bit to 'By response' and click on 'Not found (404)' This will show a list of pages that Google indexed as 404.

When you find a 404 external link, you can:

- Check that the link is typed correctly.
- Replace the link with an active link, if the page is still live.
- Remove the link if the page no longer exists.
- Replace the link with an alternative source if it added value to your site.

To set up a Google account, go to the link:

<https://accounts.google.com/signup>.

Explanation: This link takes you directly to the Google account creation page where you can input your details to create a new account.

Key points:

- **Access:** Simply navigate to "accounts.google.com/signup" in your web browser.
- **Create account:** Once on the page, click "Create account" to start the setup process.

As always Thanks for engaging with this episode of Practical Digital Strategies
