

Hello, my name is Marco and I have been working on YouTube Faceless channels for over 5 years.

In this guide I will show you how the **YouTube Automation** business works and how you can start, grow and make money with a YouTube channel without even showing your face or making any videos yourself.

I have been using this YouTube automation system to grow my own channels to over **\$30k per month**.

Before we start I want to show you screenshots of some of my channels, just so you can get an idea of the opportunities that come with starting an online business like YouTube Automation.

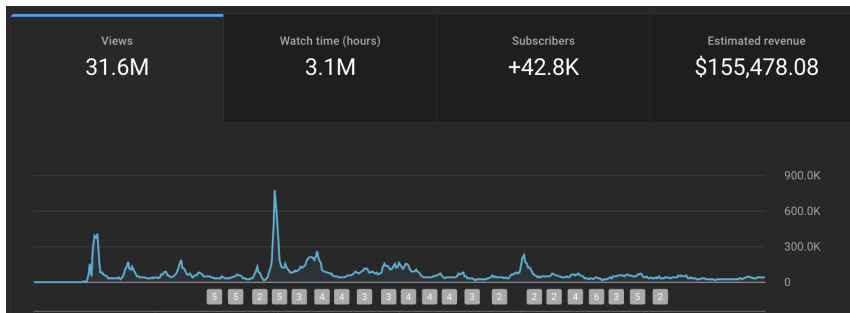

Screenshot #1

(This is one of my channels. It has a total of 213 million views and has earned a total of \$447,090 USD)

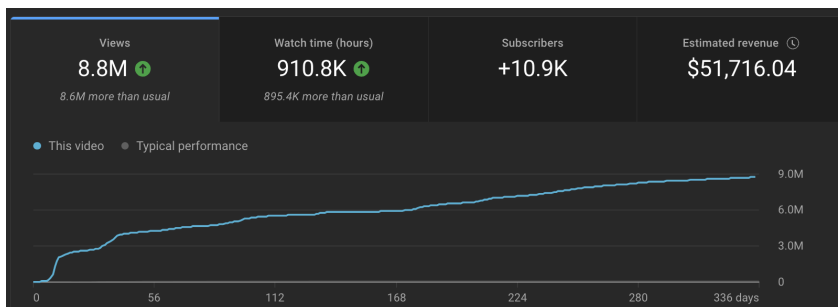

Screenshot #2

(This is another channel. It has a total of 31 million views and has earned a total of \$155,478 USD. All in a 2 year period)

Screenshot #3

(This is the analytics of just one video. This video got 8.8 million views and earned \$51,716 dollars. Craziest thing is this video only cost \$80 to make)

Ok, so now that I showed you the opportunities of starting an online business like YouTube Automation, let's start.

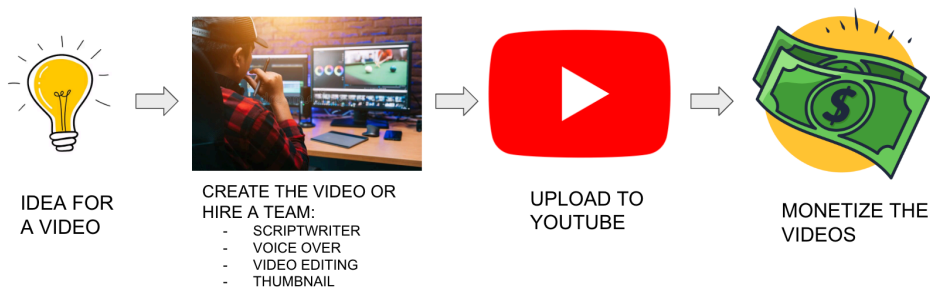

WHAT IS YOUTUBE AUTOMATION?

YouTube Automation is a business model where you basically hire a team to create videos for you and then upload them to YouTube for a profit.

You don't need to show your face on the videos because these are **faceless channels**.

And the way you make money with YouTube is with the ads that are being shown on the videos.

So basically it works like this:

This is an **average** of how much you can make with YouTube:

1,000 views = \$5

10,000 views = \$50

100,000 views = \$500

1,000,000 views = \$5,000

10,000,000 = \$50,000

Now we need to understand there are 2 types of channels on YouTube.

Personality channels and faceless channels.

We will focus on Faceless channels.

Take MrBeast as an example, he has a personality channel. Without him showing on camera, his videos would fail.

PERSONALITY CHANNEL

\$1 vs \$500,000 Plane Ticket!

120M views · 2 weeks ago · 74.7K VPH

VS

FACELESS CHANNEL

World's Most Expensive Fails...

1.2M views · 5 months ago · 52 VPH

With faceless channels on the other hand, we don't need to be on camera, show our face or even make the videos ourselves. We can hire people to do the videos for us.

The content creation team consists of these type of creators:

- Scriptwriter
- Voice Over Actor
- Video Editor
- Thumbnail Designer

Let's break down the team,

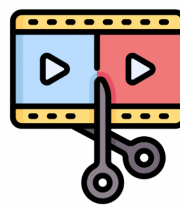

GRAPHIC
DESIGNER

SCRIPTWRITER

VOICE OVER
ACTOR

VIDEO EDITOR

You can find these content creators on platforms like Fiverr.com or upwork.com

I always start my videos thinking of the **title** and **thumbnail** first.

← THUMBNAIL

People Who Are At Another Level... ← TITLE

You can have the best video in the world, but if people are not clicking on it you won't get views.

This is considered the "packaging" of your video. Your title and thumbnail need to build enough curiosity for people to click.

After you have your title and thumbnail, you need the script.

The scriptwriter will help you create a very interesting and entertaining script based on the ideas you have for your videos. This will be the starting point for your videos.

Once you have your script ready, you will send it to a voice over narrator. This person will help give life and a personality to the information on the script with a voice over audio.

By this point we already have the title and thumbnail for our video, we have done the script and that script has been voiced.

Now we need to send all this information to the video editor.

The video editor will be like your Dr. Frankenstein giving life to your monster.

The video editor will take the voice over and create the video on top of it.

The video editor will add clips, images, music, sound effects, visual effects, and more to create a very compelling video for your audience.

Once you have your video ready, you will upload it to YouTube.

Here are some examples of YouTube Automation Channels:

<https://www.youtube.com/@TrendCentral/videos>

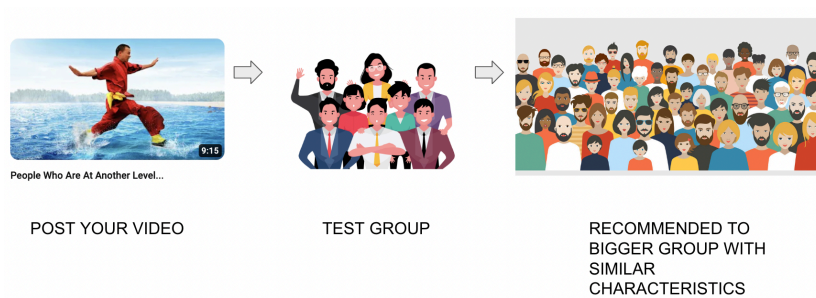

https://www.youtube.com/@Top_Luxury/videos

<https://www.youtube.com/@FluctusOfficial/videos>

<https://www.youtube.com/@CinemaWins/videos>

I share these channels so you can see how the structure of the videos work.

What happens when you upload a video to YouTube?

When you upload a video to YouTube’s platform, the algorithm will recommend the video to an audience that it believes are more likely to watch the video.

Remember, YouTube wants to:

- Predict what the viewer will watch
- Maximize the viewer’s long-term engagement and satisfaction

This audience will be a small audience at first, kind of like a “test group”

YouTube then will take all the information on how the video is performing with that initial audience like: how long people watched the video, how many people clicked on the video, video engagement, and many other data points.

If the video’s performance is good, then YouTube will try to find a broader audience with similar characteristics to the first one to show the video to.

And that is how videos will get recommended more and more.

Here are a couple of niches that you can create content on:

- | | |
|--------------|---------------|
| - Technology | - Documentary |
| - Business | - Animals |
| - Gaming | - Movies |
| - Top 10 | - History |
| - Fitness | - Geography |
| - Celebrity | - Scary |
| - Cars | - Luxury |

So let’s break down the numbers.

To make \$5,000 per month you need about **1 million** views a month.

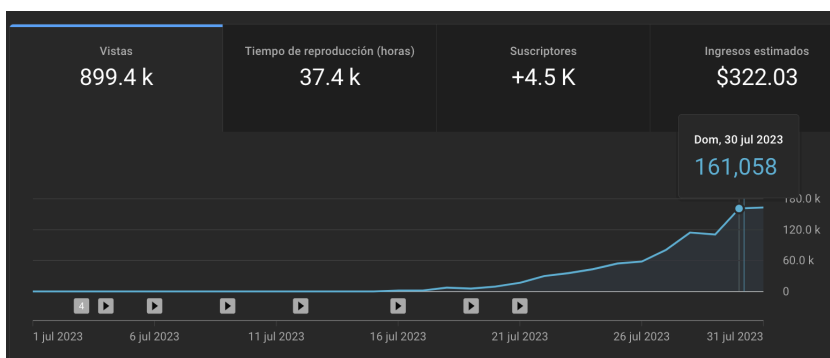

That is:

- 1 video getting 1 million views a month
- 2 videos getting 500k views a month
- 5 videos getting 200,000 views a month
- 10 videos getting 100,000 views a month
- 20 videos getting 50,000 views a month

That is **VERY** doable.

For example, check out this screenshots of a brand new channel I started and by the second month it was already making \$5,000 a month.

First Month:

Second Month:

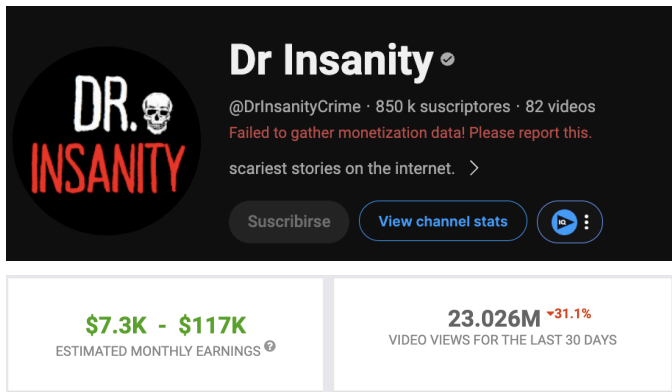

Here are more examples of YouTube Faceless channels and how much they are making per month:

Dr. Insanity

<https://www.youtube.com/@DrInsanityCrime>

This channel is getting 23 million views a month and earning around \$50,000 per month.
