

\Questions and suggested topics of discussion for the round table “SEEIIST - Towards the future”

1. A usual reaction for people learning about this method is that the pharmaceuticals will “fight” it.
Is this the case?
Is there any interaction, collaboration with pharmaceuticals going on, or any common research?
Are they partners or sponsors of such centres?
Are there collaborations regarding the new initiatives?
Has SEEIIST approached pharmaceuticals as possible collaborators?
Are they willing to sponsor such developments?
2. A usual reaction is also to see hadron therapy in competition with photon radiotherapy.
Is this substantiated?
3. What is the approach of health insurance systems?
What are the experiences of existing facilities in Europe and US
How is SEEIIST planning to handle this issue, being an intergovernmental initiative.
4. What are “lessons learnt” from existing hadron therapy facilities and the most important feedback to SEEIIST?
- 5.
- 6.
- 7.
