Veo's directions to upload and troubleshoot

## Verify video is uploading

1. Ensure that the camera is powered on & ethernet cable is connected
2. Connect to the desired camera using the VEO APP
3. You might need to try to connect a few times.
4. Once connected Tap on the Library button in the top left corner.
5. The on camera tab shows the videos that haven't uploaded yet.
6. Looking at the picture below, the top video will not upload until it's named. Which is done by using the 3 little dots. It's recommended that you change the name 1st. Then it "should" upload but you can also click the 3 dots again to force it to upload.
7. The bottom video will upload once the camera is connected to the internet with the ethernet.
