

General

- **Name:** Judd Moore
- **Species:** Anthropomorphic Bovine (Bull)
 - **Breed:** Holstein-Texas Longhorn mix (mix of the best dairy and beef breeds)
- **Gender:** Male
- **Height:** 7'5" (2.26m)
- **Weight:** 350 lbs (159kg)
- **Sexual Orientation:** Homosexual
- **Sexual Role:** Bottom
 - **Submissive Bottom or Power Bottom:** Submissive bottom but can become a power bottom when that rare moment overtakes him.
- **Zodiac Sign:** Sagittarius
- **Chinese Zodiac Sign:** Horse (Metal)
- **MBTI Personality Type:** INFJ
- **Status:** Single

Appearance

- **Body Type:** Quite muscular
- **Upper Body Region:** Has an upper body like Alexey Lesukov, notably Alexey's arms and pecs. The pecs are bigger and plumper outward.

- **Lower Body Region:** Has a lower body like Skye Woods, notably Skye's legs and ass.

- **Fur:**
 - **Length:** Very short

- **Characteristics:** Feels nice and smooth, like a second skin. The fur tapers off into skin on his snout, groin area, and the taint and hole area.
- **Horns:**
 - **Shape:** Classic Texas-Longhorn but the horns go straight out from his head and upward.
 - **Span:** Measured from tip to tip in a straight line, 2.5 feet (0.75m).
- **Head Hair:** None.
- **Nipples:**
 - **Characteristics:** Always supple and “erect.”
 - **Size:** Areolas measure 5.9” wide x 4.3” tall (15.1cm x 11cm). The nipples are 0.6” long (1.6cm).
- **Cock:**
 - **Flaccid:** 14.8” length x 12.4” circumference x 4” diameter (37.7cm x 31.4cm x 10cm)
 - **Erect:** 22.3” length x 15.3” circumference x 4.9” diameter (56.7cm x 39.1cm x 12.5cm)
 - **Type:** Human with medial ring
 - **Cut or Uncut:** Cut
- **Balls:** Big, round, and heavy. They hang almost to his knees.
 - **Balls Size:** 10.7” diameter each/33.6” circumference each (27.2cm diameter each/85.4cm circumference each)
- **Hole:** A bovine/slight "donut" hole.
- **Other:**
 - Bovine ears.
 - Human hands but his feet are a mixture of human feet and hooves. The two-toed hooves are where human toes would be and where the fetlock and pastern would be is like a slightly raised heel.
 - Tail with a tuft of white fur on the end. When his tail is relaxed and hanging downward, the end of the tail is level with the back of his knees.
 - No extra fur or hair to act as body hair (armpit, pubic, chest, arm, etc.)
 - No piercings, tattoos, or scars.
- **Colors:**
 - **Eye Color:** Pink (#cb91ba)
 - **Fur Color:** Entire fur coat is a blue called storm gray (#6c6d8b). However, from his mid-calves and down to his hooves and on each of his fingers is darker gray fur (#654a5b). The inside of his ears is like a white (#d5ced5). The tuft of fur at the end of his tail is an off-white (#ded8dc).
 - **Flesh Colors:** The snout, nipples, groin area, cock, balls, hole and taint area are a dark gray color (#664b5c). The inside of his mouth is a pink (#c886b4).

- **Horn Color:** The horns are a darker shade of gray (#52404e) with a pattern of white diamond-like stars on them.
- **Hooves Color:** His hooves have a very dark gray color (#584050).
- **Eyebrow Color:** A dark gray (#5b4351)

Characteristics

- Judd is:
 - Humorous
 - Easygoing
 - Kind
 - Courteous
 - Passive
 - Smart
 - Liberal
 - Lighthearted
 - A geek
 - Always looking to make friends but can be shy
 - Altruistic to friends and deserving strangers
 - A gentle soul but will lash out if you do him wrong
 - Childish at one moment then mature at the next
 - Loyal to his friends
 - Ambitious and passionate about his job and business
 - Somewhat of an exhibitionist
 - Thoroughly enjoys sex
- Because he is half Holstein, he produces milk from his pecs.
- Because he is half Texas Longhorn, he is very strong.
 - Can lift or pull two to four times his body weight.
- Erogenous zones: pecs, nipples, cock, butt, hole, and neck.
- He likes to refer to his horns as “handlebars” during some sexual acts and enjoys it when they are “used.”
- He can deepthroat lengthy cocks.
 - Almost has no gag reflex.
 - Enjoys cock sucking as much as bottoming.
 - Loves cum eating; he will gladly be an oral cumdump.
 - If the cock is too hyper, he will jack it off while licking it, rubbing it with his mouth and lips, and slobbering all over it. He may also pec-fuck it, frot with it, or "hot dog" it.

- Likewise, he can take **very** lengthy and girthy cocks and toys up his ass.
 - His hole isn't exactly tight, but it firmly grasps the penetrator.
 - He has a sensitive prostate, thus increasing his pleasure from bottoming.
 - He thoroughly enjoys men cumming in his ass; he will gladly be an anal cumdump.
 - His hole will momentarily maintain a gape according to the size of the cock or toy that was inserted.
 - If the cock is too hyper, he will jack it off while licking it, rubbing it with his mouth and lips, and slobbering all over it. He may also pec-fuck it, frot with it, or "hot dog" it.
- His stomach and skin can expand and stretch (to a point) to allow bulging from penetration of **very** lengthy cocks or toys and swelling from cum inflation and excessive cum eating or milk drinking.
- He enjoys feeling the weight and size of his package.
 - Opts to nudity when he can, goes freeballing, or wears unrestrictive anatomically correct underwear.
 - Swings his package side to side, front to back.
- He produces excessive amounts of pre-cum, cum, and milk.
 - Pre-cum: Can leak up to 10 gallons (~40L).
 - Cum: Ejaculates up to 20 gallons (~80L), depending on how horny or pent up he is.
 - Milk: Lactates around 5 gallons (~20L) with each milking.
- Due to these volumes, he milks himself (in both meanings of the word) at least once daily.
 - These milkings, in addition to the stars on his horns, became the inspiration to start his business, "The Milky Way," so as not to let these fluids go to waste.
- He trained himself to be able to control how much cum is ejaculated but retains the body-rocking orgasm of the should-have-been ejaculation.
 - Useful in limiting destruction, limiting messes, pouring for himself or someone else a glass full, etc.
- If he forgets a cock milking, his balls will slightly swell from the extra cum and he may have a **large** ejaculation without warning and without any or little stimulation.
 - The instant erection may pop out of his clothing or burst/shred his clothing.
 - The pleasure from this release is so great that he is almost knocked unconscious.
 - If he is in public at the time, it brings wanted and unwanted attention, but he seems to enjoy it.
 - With these previous statements in mind, one could say he occasionally forgets to milk himself on purpose...

- If he forgets a pec milking, his pecs will slightly swell from the extra milk, his nipples will begin to leak milk, and his pecs and nipples become **very** sensitive to the touch.
 - At this stage, touching his nipples and pecs and relieving them of the milk becomes orgasmic.

Other:

- **Nickname:** “Juggs”
 - Sounds close to his actual name and due to his big pecs and his ability to cum and lactate “jugs.”
- Sometimes wears glasses.

Profession and Business:

- Judd is the owner and creator of “The Milky Way,” a dairy bar and bakery catering to gay males (human, humanoid and furry). However, customers of other genders and sexual orientations are welcome. “The Milky Way” serves its patrons products made with male milk and/or cum. Cum is referred to as “cream” in the establishment. Products include: cakes, cupcakes, brownies, cookies, pies, pastries, milk (warm or cold), “cream” (warm or cold), custard, ice cream (soft and hard), gelato, milkshakes, sundaes, yogurt, parfaits, frozen yogurt, frozen custard...pretty much anything that would require milk and/or cream. The establishment is a sit down and/or to-go dairy bar. Patrons can even purchase milk or “cream” to take home with them for their own use and enjoyment. Special orders can be placed ahead of time as well, such as cakes, cupcakes, etc.
- Employees at “The Milky Way” are all male (human, humanoid and furry), usually have muscular builds, but there can be any body build. (Male lactation is not a requirement to be hired, but it is a definite plus to keep the milk inventory up.) The employees do not have set positions; they work on a rotation schedule. It keeps them on their toes and makes it less boring. They rotate from waiting on and serving patrons, to cleaning, to baking, to preparing and making the refrigerated and frozen items, to preparing the servers’ orders, to manning the baked goods display case, to manning the hard ice cream/gelato/yogurt display case, to manning the soft ice cream/frozen yogurt/frozen custard dispensers, and replenishing the milk and “cream” inventory by milking themselves. Once a week, the milk and “cream” holding tanks, the piping, the dispensing areas, and the milking equipment and machinery are inspected for compromises. The employee uniform is quite minimal for the patrons’ gawking enjoyment (there have been incidents where patrons have gone further than that and staff may or may not have consented) and for the employee’s ease of access for milkings. The uniform includes: a black short sleeve shirt with 3 thick white vertical stripes that ends at the collarbone so

the majority of the pecs are exposed (see reference picture below), a speedo that has the pattern of a black and white tuxedo, and shoes are optional.

- When Judd is at “The Milky Way,” he too will dress in the employee uniform. He will go around to the patrons to chit chat and to make sure they are completely satisfied with the food and the service. He will also perform employee tasks, even though he is the owner, to his enjoyment and to boost employee morale.
- Judd and his staff come in early every day to prepare for the coming day’s business. First off, they all take showers in the employee locker room and bathroom. This is to uphold the cleanliness of the food items because of how the food items are made and that the employee uniforms offer little coverage. Next, all perform a morning milking session to top off the milk and “cream” holding tanks with fresh. Judd, usually being the first to arrive as he is the owner, has the first milking session of the day (but he sometimes abstains for “reasons”) and the rest follow. Baking preparation and baking are next. Then, preparing and batch making for any ice cream, gelato, yogurt, and frozen yogurt needed. And, just like any bakery, the confections past the recommended sell by date must be disposed of. (To prevent it from always going in the trash, Judd and his employees either take some home with them, donate some to food banks, turn some into free samples for inside and outside “The Milky Way,” or sell the items at discounted prices as closing approaches each night.) Finally, The Milky Way” is opened for business.
- Judd often leaves his business during the day and returns or sometimes leaves for the entire working day.
- [Floor Plan](#). Scale is $\frac{1}{4}$ inch = 1 foot. The ceilings are 20 feet high (6.1m) to allow for tall customers and employees.
- Outside of “The Milky Way,” there are 4 windows and a sign with the business’s name front and center. This sign can light up at night. The design is either light blue letters within a starry white spurt of liquid or a starry white bust of pecs and the light blue letters underneath? Once you enter the establishment through the glass double doors, you are greeted by the dining area and a long rug. The design of this area is very modern with

colors of beige, black and white. To the right of the front doors, large menus hang on the entire length of the wall. Opposite of the front doors is a fridge and freezer which contains milk, “cream”, ice cream, gelato, yogurt, frozen yogurt, custard and frozen custard for customers to purchase and take home. To the left of the fridge is the cash register and the baked goods display case. To the left of this display case is the yogurt/ice cream/gelato display case, but between the two display cases is a walkway to allow employees to enter the kitchen, with its swinging doors situated between the two cases, and to enter behind each display case. Behind the display cases are counters that house silverware, tableware, glassware, and any miscellaneous items. Also, behind the ice cream/gelato/yogurt display case are the frozen yogurt, the soft ice cream, and frozen custard dispensers and containers for various toppings. On either side of the wall separating the front of the business and the kitchen, there is a server’s window looking into the kitchen. Milkshake machines are to the left of the gelato on top of a curved counter. In front of the display cases, cafe tables populate the floor. A public restroom is located to the left of the gelato.

- Kitchen area - Once you enter the kitchen from the swinging doors, you are greeted by a very large work table. Food prep and decorating confections occur here. In the middle of the table are racks for pots, pans, and utensils and on the opposite side of the table are stations for ice cream makers. A large storage rack is situated to the right of this table. On either side of the entrance there are counters with food mixers on top. Drawers and cupboards are also underneath these counters for storage. Still standing from this position, to the utmost left is the employee bathroom and locker room while to the utmost right is Judd’s office. Next to Judd’s office is the employee entrance and the dock for shipments. Behind the very large table is a very large island which houses the tabletop stoves and ovens. Again, in the middle of the island are racks for pots, pans, and utensils and a large storage rack is located to the right of the island. To the left of this island are very large food mixers for large batches of batter, frosting, etc. To the right of the employee bathroom is the cleaning area. Sinks, soaking sinks, drying racks, and dishwashers populate this area along the wall. To the right of this area is the pantry, where food items can be stored at room temperature. Next to the dock are the walk-in freezer and walk-in refrigerator. At the very back of the kitchen is the room dedicated to the milking machine. Finally, the ceiling in the kitchen is covered in a network of refrigerated metal pipes which is feeding the milk and “cream” from the basement into the kitchen. There are many spouts and hoses throughout the kitchen.
- Milking machine area - Within its room at the back of the kitchen, three reclined chair apparatuses are located at the very center. These apparatuses can swivel, can withstand very heavy persons and the apparatus has the capability of expanding to accommodate very tall persons. Above the apparatuses are very large metal pipes that run along the ceiling, along the back wall, and through the floor into the basement to the holding tanks.

The pipes are labeled "CREAM" and "MILK" as they populate the ceiling. Connected to these large pipes above the apparatuses are clear hoses that are curled up on spools connected to the ceiling to allow the hoses to be extended further or retracted, if needed. There are six spools in total, able to accommodate 6 men at the minimum. The end of the hoses hang downward within reach and there are metal connectors on the ends of the hoses. Along the walls of the room hang various sizes of cock sleeves and nipple cups and attachments for the apparatuses. These cock sleeves and nipple cups are sleek, clear and made of a silicone-like substance. The suction applied to these devices will squeeze and/or glide them along the cock and/or nipples. At the top of each one is the corresponding connector to the hoses on the ceiling. Attachments for the apparatuses include those of which to further sexually stimulate the user, if they so desire. One example would be leg stir-ups in conjunction with a dildo machine. The control pad for the apparatuses and the milking machine is on the left side seat of the apparatus. The pump for the milking machine is located within the ceiling above the pipes. The pumps on top of the holding tanks in the basement also operate at the same time to help facilitate the movement of the milk and "cream" into the tanks. In the leftmost corner of the room is the elevator to the basement and in the rightmost corner are the stairs. The elevator motor room is in the basement.

- Milk and "cream" storage area - Taking either the elevator or the stairs, you will be greeted by the holding tanks and backup tanks for the milk and "cream" in an expansive basement that is like an industrial warehouse and the tanks are completely refrigerated to keep the contents from spoiling. The cylindrical milk and "cream" holding tanks (along with back up tanks) are ~165ft (50m) high and ~165ft (50m) in diameter with a capacity of ~35 million gallons (~130 million liters). This is to account for hyper excessive/excessive cummers and lactators and to allow our milk and "cream" inventory to build up as the business uses less milk and "cream" than it produces. Pipes, along with their motors, are attached to the top of each of the holding tanks, one for pumping in and one for pumping out. Backup tanks do not get a pipe that pumps in, but rather a pipe that is attached at the top of the holding tank and connects to the back up tank at a downward slope. This is so that, if the contents of the holding tank reaches the top, the contents will then spill out into the back up tank. The back up tanks do however get motors and pipes that pump out. The pipes that pump in wind their way down from the milking machine area. The pipes that pump out leads to a network of other pipes to distribute the milk and "cream" to various dispensing areas around the kitchen. A catwalk is also accessible via the elevator and stairs to observe the tanks and the system of pipes with ease. Drains can be seen across the floor in case of a leak or a flood from the tank(s).
- If a patron requests a glass of milk or "cream", a milkshake, or to have a milk or "cream" topping on/with their food item, the waiter will ask the patron if they would like their milk or "cream" taken from the kitchen or to get it fresh from the "tap". If the patron

answers that he wants it fresh from the “tap”, the waiter will either milk his pees or cock into a glass, into a milkshake mixing cup, or on the food item, all while in front of the patron. Cum control is key here to “pour” just the right amounts, although “over-pouring” has occurred.

- “The Milky Way” offers patrons the capability to take part in making their own food items. For an additional fee, the patron will be escorted all the way to the milking machine area. Here, an attachment is placed on the milking machine so as not to allow the patron’s milk or cum to be pumped into the holding tanks; it will be pumped into a portable separate vessel(s). The milking machine is then placed onto the patron and is allowed one complete milking for milk and/or cum. Then, the patron and the patron’s milk and/or cum, now “cream,” is transferred to the kitchen. Here, the patron may continue to his seat and wait or he may observe the process of making the food item. The remaining milk and/or “cream” are bottled up and given to the patron to take home.
- Private parties, holiday themed events, monthly special guest servers with signature dishes, and other special events may occur
 - One special event example would be a milkshot and “creamshot” event. A durable island would be brought onto the dining floor along with bar stools. When a customer sits at this island, a consenting employee will then hop onto the island and place themselves (sit, kneel, stand, etc.) in front of the customer. The customer will then drink milk and/or “cream” as they see fit.

Likes/Does/Please Do’s

● Anal gaping ● Anal sex (Receiving) ● Animals ● Ass play ● Ass worship ● Auto-fellatio ● Autumn ● Average cocks ● Baked goods ● Bathhouses ● Baths ● Being a cum dump ● Being caught in the middle ● Being naked ● Being with friends ○ Guys and girls	● Cock/ball worship ● Collecting cum up his ass ● Collecting his cum for future use ● Collecting his milk for future use ● Condom play ● Cooking and baking ● Creampies ● Cuddling ● Cum bath ● Cum facials ● Cum inflation (Light/Medium) ● Cum in food and drink ● Cut cocks ● Dad/son play ● Dancing ● Dating
