## **SECTION A- READING SKILLS (20 Marks)**

## Q. I Read the following passage and answer the given questions.

10 marks

In acupuncture, no drug is injected into the body, so it has no adverse effects. The stimulation of acupuncture points was done so far by very thin, sharp sliver needles. The prick is almost painless. But now techniques like the use of laser beams (without using needles) are being used in which there is no prick, no pain. These are readily acceptable to children and those patients who are scared of needles. For every patient, there is a separate set of needles, which is sterilized after every use, so there should not be any fear of infection. Initially three or four courses of acupuncture treatment are given (one course is of ten days) to control asthma and usually the patient is off medicine by that time. After this, one sitting, weekly or fortnightly, is continued for some time, so as to prevent relapse. At the time of Holi or Diwali when there is a change of season, there is a tendency of relapse, so once/twice a week sittings are given during the period of three seasons, which generally results in an almost cure in the children and young patients (up to the age of 25-30 years). Relapses are generally unusual. In older age groups though some damage to lungs has been done due to prolonged disease and medication, yet considerable improvement is possible resulting in decrease in severity and frequency of

Based on the reading of the above passage complete the following by choosing the most suitable options:

10 x 1 marks

- (i) Acupuncture has no adverse effects because:
- (a) only needles are used
- (b) no drug is injected
- (c) no pricks are made in the body
- (d) the body is not touched at all
- Laser beams are acceptable to those patients who:
- (a) are scared of needles
- (b) are childish
- (c) cannot bear any pain
- (d) do not need needles
- Acupuncture treatment continues for some time so that:
- (a) the patient does not need any medicine
- (b) the patient gets used to it
- (c) there is no chance of relapse
- (d) the patient is cured forever
- 'Severity' means:
- (a) seriousness/acuteness
- (b) harshness
- (c) unkindness
- (d) extreme pain
- In older patients, sometimes:
- (a) the lungs are completely damaged
- (b) relapses do occur
- (c) treatment is unsuccessful
- (d) death occurs

(a) 10 days

- (vi) What is the duration of course of Acupuncture
- (vii) At what time of the year the chance of relapse is more

(b) 12 days

- (a) At the Holi time
- (b) At the Diwali Time
- (c) Both a & b

(c) 3-4 days

(d) No such time

- (viii) Which word in the paragraph is used for the process of making needle free from contaminants

- (x) The antonym of **prolonged** is.....
- (a) Chronic (b) shorter duration (c) longer duration (d) Permanent

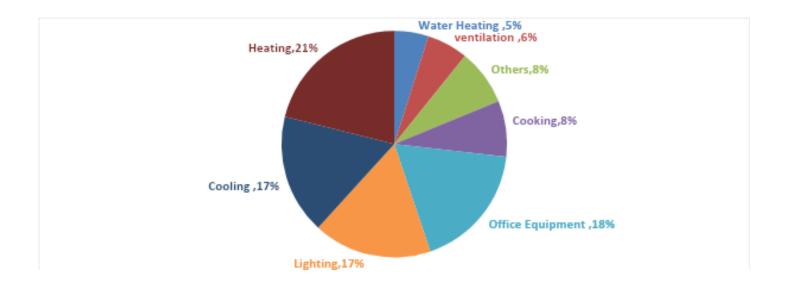

## Q II Read the following passage and answer the given questions.

10 marks

1. Maintaining a business infrastructure is an expensive task and your HVAC (Heat, Ventilation and Air Conditioning) system is a key part of these costs. But replacing an outdated system with new efficient units and advanced controls will benefit your organization in many ways.

(d) cure

2. On an average, HVAC equipment accounts for up to 44% of a business' monthly energy expenditures. Immediate energy savings will be realized with a new efficient system. New systems use motors and compressors with less energy consumption than their counterparts designed and manufactured a decade ago. Further savings will be seen with advanced variable frequency drives and energy management systems.

- 3. Natural resource conservation benefits us and our environment. New high-efficiency equipment and design strategies reduce overall energy consumption and environmental impact. Green HVAC systems save money and reduce environmental impact when designed, installed, and maintained properly.
- 4. Programmable thermostats are a simple upgrade, allowing you to control the system based on time. In the summer, if your business is closed from 8:00pm to 6:00 am, set the programable thermostat cooling point higher. If the unit is not running, it will not use energy. Greater savings will be seen with advanced designs and controls. Zoning systems allow one system to maintain different temperatures in different locations.
- 5. Property values are based on location and the infrastructure in place. A new energy efficient system will increase the building value if you lease or sell.
- 6. In retail situations, even temperatures and proper ventilation will put your customers at ease. A customer that is uncomfortable may not return and a loyal customer is worth 10 times their initial purchase.
- 7. Performance gains will be seen in both process and employees. Maintaining proper coolant temperature in machining equipment will reduce tool wear and increase product quality. Worker performance will also increase. Employees are more productive without the added stress of an uncomfortable work environment.
- 8. With ageing, systems and components wear out. Repairs will be needed. Before committing to a repair, it is advisable to compare the service cost versus their placement cost. The replacement system's energy savings alone may pay for itself with in a few years.

Based on your understanding of the passage, answer these questions by choosing the correct option. 10x1 marks
